Select Commercial HPWH

Login to your home Wi-Fi

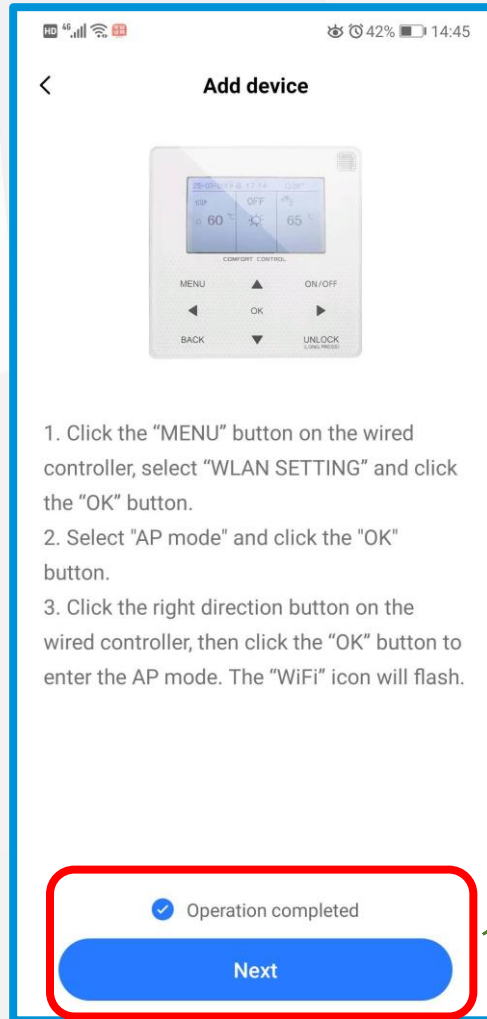

Select the Central heating Water Heater

The App will automatically find out the controller, here the controller is KJRH-120F

Agree and click OK

A screenshot of a smartphone app interface titled "Add device". At the top, there's a back arrow and the title. Below the title is an image of a white wired remote control with a digital display showing "60" and "65". Below the remote are four buttons: "MENU", "ON/OFF", "OK", and "UNLOCK (LONG PRESS)". Below the buttons is a list of three numbered instructions. At the bottom, there is a status bar with a checkmark and the text "Operation completed", and a large blue "Next" button. A red rectangle highlights the "Operation completed" status and the "Next" button.

Add device

1. Click the "MENU" button on the wired controller, select "WLAN SETTING" and click the "OK" button.

2. Select "AP mode" and click the "OK" button.

3. Click the right direction button on the wired controller, then click the "OK" button to enter the AP mode. The "WiFi" icon will flash.

✓ Operation completed
